- Manage Current State Business Architecture
- Facilitate Future State Business Architecture

### Plan Future State Architecture
- Assess Current State IT Environment
- Plan Updates to Existing Technologies
- Develop Future State IT Architecture
- Develop and Maintain Roadmaps
- Support Portfolio Rationalization

### Drive Reuse and Standards Adherence
- Set Technology Standards
- Manage Reference Architecture
- Influence Solutions Architecture
- Manage Integration
- Enable and Promote Reuse
- Promote Standards Adherence

### Govern Information Management
- Design Information Management Strategy
- Manage Information Governance
- Define and Manage Data Standards
- Plan Information Management Capabilities
- Manage Data Architecture

### Manage Activities That Align with or Support EA
- Assess Innovation Opportunities
- Design IT Strategic Plan
- Support Project Design and Delivery
- Support Technology Vendor Relationships

### Manage EA
- Manage EA’s Mandate
- Manage EA Talent
- Measure and Report EA Performance
- Support Distributed Architects
- Manage Cross-Functional Partnerships
